

# GenHET

A new initiative in gender in High Energy Theory

Yolanda Lozano (U. Oviedo)

@23rd European String Workshop,  
King's College, London, April 2018

Universidad de Oviedo

# The involvement of women string theorists in gender issues started with an EU project that ran from 2013 to 2017

## MPNS COST Action MP1210

### The String Theory Universe

Descriptions are provided by the Actions directly via e-COST.

Although String Theory has been around for more than forty years, it has never been so important for physical reality as it is now, due to its novel outstanding applications to different areas of Physics and Mathematics.

While the Large Hadron Collider (LHC) narrows down the experimental limits on supersymmetric particles and satellite missions such as WMAP and PLANCK probe the very early Universe, this Action aims at creating a strong European Network focused on fundamental, forefront research exploring the role played by String Theory in Particle Physics, Cosmology and Condensed Matter Physics.

The large majority of European world experts in String Theory will be involved in this Action. This will ensure a top quality research output, achieved through an intense exchange of expertise, intra-European collaboration and co-organization of scientific activities.

The Action will ensure fair gender representation and simultaneously adopt specific measures for promoting the involvement of women scientists at all levels. Moreover, it will foster the active participation of junior excellent scientists.

The outcome of the Action is expected to have a positive impact on both science and society at a European level, in line with the strategic priorities of COST.

#### Materials, Physical and Nanosciences COST Action MP1210

Annual Progress Conference Report

## Under this Action we:

- Promoted the active participation of women (leading positions, speakers, members of scientific and organizing committees)
- Made the community aware of many important studies about women in STEM, unconscious gender bias, gender stereotypes,..
  - Gender events as part of each major scientific conference/workshop
  - “Workshops on String Theory and Gender”
- Conducted several surveys to know the opinions of the community

Surveys provided very interesting input:

# Surveys provided very interesting input:

Women and men in my field have equal opportunities for career advancement

Male respondents

Women and men in my field have equal opportunities for career advancement

Female respondents

Male: 58.1% agree  
31.3% disagree

Female: 33.9% agree  
49.2% disagree

Many respondents argue that although on paper both genders are treated equally, conscious and unconscious biases, pregnancy and childbirth, and different expectations from society about caring roles are main sources of differences. Some men perceive better opportunities for women because of specific policies to promote them

The String Theory scientific environment is particularly difficult for women compared to those of other science and engineering discipli...

Male respondents

The String Theory scientific environment is particularly difficult for women compared to those of other science and engineering discipli...

Female respondents

Male: 24.1% agree  
40.2% disagree

Female: 49.0% agree  
20.4% disagree

This question was intended to identify aspects of our field that could be particularly “problematic”. Respondents alluded to the already present disparity, which may psychologically disadvantage women, the long post-doc period, the lack of experimental tests in String Theory, which resonates with the unconscious bias, by associating relevant results with particular authors

**Women in my field with young families or caring responsibilities are disadvantaged in their career**

Male respondents

**Women in my field with young families or caring responsibilities are disadvantaged in their career**

Female respondents

Male: 78.6% agree  
9.8% disagree

Female: 78% agree  
11.8% disagree

**Men in my field with young families or caring responsibilities are disadvantaged in their career**

Male respondents

**Men in my field with young families or caring responsibilities are disadvantaged in their career**

Female respondents

Male: 44.7% agree  
19.7% disagree

Female: 33.9% agree  
40.7% disagree

Number of respondents: 172

Male: 112

Female: 50

15 PhD students, 44 postdocs, 113 permanent

- We collected useful statistics

Data taken from composition of the Action in 2015

Women = 72

Men = 482

PhD = 27      37.5%

PhD = 107      22.2%

Postdocs = 12      16.7%

Postdocs = 114      23.7%

Permanent = 33      45.8%

Permanent = 261      54.1%

Total = 554 (Women = 13%)

PhD = 134      24.2%      (Women = 20.1%)

Postdocs = 126      22.7%      (Women = 9.5%)

Permanent = 294      53.1%      (Women = 11.2%)

# success rate women/men postdoctoral applicants

Data collected from the European Joint Postdoctoral Recruitment coordinated by A. Van Proeyen

Year	# Candidates	# Women candidates	Taken in our institutes	# Total taken % Total taken/ Candidates	# Women % W taken /W candidates	#Men % M taken / M candidates	% Women taken/ Total taken
2005	239	22 (9%)	18 (8%)	1 (5%)	17 (8%)	(6%)	
2006	207	26 (13%)	33 (16%)	6 (23%)	27 (15%)	(18%)	
2007	186	19 (10%)	20 (11%)	3 (16%)	17 (10%)	(15%)	
2008	226	26 (12%)	25 (11%)	3 (12%)	22 (11%)	(12%)	
2009	354	41 (12%)	24 (7%)	4 (9%)	20 (6%)	(16%)	
2010	400	35 (9%)	34 (9%)	3 (9%)	31 (8%)	(9%)	
2011	411	41 (10%)	25 (6%)	1 (2%)	24 (6%)	(4%)	
2012	416	55 (13%)	35 (8%)	2 (4%)	33 (9%)	(6%)	
2013	365	35 (10%)	40 (11%)	0 (0%)	40 (12%)	(0%)	
2014	438	50 (11%)	54 (12%)	7 (14%)	47 (12%)	(13%)	
2015	412	47 (11%)	39 (9%)	3 (6%)	36 (10%)	(8%)	
2016	476	37 (8%)	44 (9%)	3 (8%)	41 (9%)	(7%)	
2017	416	55 (13%)	40 (10%)	7 (13%)	33 (9%)	(18%)	

## After COST

- A synergic network of women string theorists has been built
- There is more awareness in the field and the discussion has been opened
- The importance of gender issues, not only sociologically but also in our scientific environment, has been transmitted

The Action has produced a very useful report, that summarizes its gender activities and the conclusions reached:

*The COST Action “The String Theory Universe”: A proactive approach to gender issues in Theoretical Physics*

<http://www.weizmann.ac.il/stringuniverse/>

## But, what next?

The impact of the Action on the gender issue relies on the community's capabilities to keep alive the discussion and the various initiatives that have been taken

We decided to create a working group that would take care of keeping up cooperative efforts on the gender issue

- Ensure that women in the field are given the right visibility
- Make available material that can help the community in dealing with gender issues
- Expand to affine areas. Compare situations

## CERN's involvement

We asked CERN to host our webpage

But CERN's involvement has gone much further, thanks to the crucial support of Fabiola Gianotti and, especially, Gian Giudice

As a result:

A new working group has been created, that involves [all High Energy Theorists](#), supported technically and financially (partially) by CERN

This working group will deal with our previous objectives, in a wider (HET) community

This will allow us to compare the situation in different sub-fields

# 1st Workshop on High Energy Theory and Gender

26-28 September 2018

CERN

Europe/Zurich timezone

This workshop will both focus on recent developments in theoretical high energy physics and cosmology, and discuss issues of gender and equal opportunities in the field.

In addition to talks on nuclear and string theory, SM and BSM phenomenology, lattice field theory and cosmology, each day talks and panel discussions will be dedicated to research on gender in academia, with an aim to further the development and implementation of action plans to support women and other minorities in physics.

Since any positive change needs the support of the whole community we encourage everyone, men and women, junior and senior scientists, to participate in this workshop.

**Registration:** There is no registration fee. Applications to attend will be open until September 01, 2018

## International Advisory Committee:

- Sonia Bacca (JGU Mainz) (Nuclear)
- Anna Ceresole (INFN Turin) (String)
- Valentina Forini (HU Berlin) (String)
- Rohini M. Godbole (Indian Institute of Science, Bangalore) (SM/BSM)
- Pilar Hernández (Valencia University, IFIC) (Neutrinos/Lattice)
- Maria Lledo (Valencia University, IFIC) (String)
- Prado Martin Moruno (Madrid University) (Cosmo)
- Yosef Nir (Weizmann Institute) (SM/BSM)
- Michela Petrini (Paris, LPTHE) (String)
- Laura Reina (Florida State University) (SM/BSM)
- Geraldine Servant (Universität Hamburg & DESY) (SM/BSM)

## Organising Committee:

- Gian Giudice (CERN) (BSM)
- Alessandra Gnechi (CERN) (String)
- Mariana Grana (CEA/Saclay) (String)
- Gabriele Honecker (JGU Mainz) (String)
- Yolanda Lozano (University of Oviedo) (String)
- Silvia Penati (University of Milano-Bicocca) (String)
- Gavin Salam (CERN) (SM)
- Marika Taylor (University of Southampton) (String)
- Andrea Thamm (CERN) (BSM)
- Malgorzata Worek (RWTH Aachen University) (SM)

## (Tentative) gender experts:

1. **Jessica Wade** (Imperial College) - On the Road to Equality
2. **Marieke van den Brink** (Nijmegen, Holland) - Study of professorial appointments
3. **Louise Archer** (King's College, London) - Gender and career aspirations

## (Tentative) list of speakers:

- Ana Achúcarro (University of Leiden)
- Asimina Arvanitaki (Perimeter Institute)
- Agnese Bissi (Uppsala University)
- Ruth Britto (Trinity College, Dublin)
- Alejandra Castro (University of Amsterdam)
- Laura Covi (University of Göttingen)
- Elvira Gámiz (University of Granada)
- Vera Guelpers (University of Southampton)
- Silvia Pascoli (University of Durham)
- Tracy Slatyer (MIT)
- Maria Ubioli (University of Cambridge)
- Eleni Vryonidou (CERN)
- Korinna Zapp (University of Lisbon)

**Thanks!**
